

## CATT OBJECTIVES

- Promote and encourage growth in the use of Trenchless Technologies.
- Conduct fundamental and applied research in the evolution of Trenchless Technologies.
- Utilize research programs as vehicles to educate highly qualified industrial personnel.
- Organize specialized training programs.
- Develop material and installation specifications.
- Support municipalities and industry in identification and application of trenchless technologies and management systems.
- Organize technology transfer initiatives.
- Network with other centres specializing in underground infrastructure research.

## *About the CATT*

*Established in 1994, the Centre for Advancement of Trenchless Technologies (CATT) located at the University of Waterloo, in Ontario, Canada is a grouping of educational, municipal, industrial, business and federal representatives committed to the advancement of knowledge, techniques, materials, methods and equipment used in Trenchless technology.*

*Geographically, the Centre serves Canada and the northern United States. A board of Directors (the majority from the private sector) aid in the development of research programs and educational technology transfer programs.*

## **CENTRE for ADVANCEMENT of TRENCHLESS TECHNOLOGIES**

*Building Sustainable Buried  
Infrastructure Since 1994*

**UNIVERSITY OF  
WATERLOO**

## MEMBERSHIP BENEFITS

CATT membership is of interest and open to individuals, agencies and corporations involved with underground infrastructure systems. Annual member rates are based on the type of membership.

*All CATT Members will be provided with:*

- 25% discount for our industry leading education and training seminars
- Up to 20% discount on contracts and research projects
- Membership of Canada's premier trenchless technology advocacy and research centre.
- Access to CATT's technical expertise and membership
- Acknowledgment on our website and certificate of membership
- Networking opportunities
