## Conference Themes

The most characteristic themes for the 11th International Conference on Asphalt Pavements, sponsored by International Society for Asphalt Pavements (ISAP) and Japan Road Association (JRA), are asphalt pavement technologies, especially those recently developed for coping with environmental problems and for enhancing safety that are concerned by all over the world. The themes also include other conventional aspects such as pavement design, material, constructions and so on.

In addition to these pavement technologies, road administrative issues are important. The conference themes include all categories of technical and administrative issues with respect to arterial roads, local roads, and, low-cost roads etc. The expected papers for a part of the program should deal with academic, practical or case studies.

1. Environment Issues and Traffic Safety
2. Structural & Surface Design for Pavements
3. Developments in Pavement Materials
4. Construction Technologies
5. Management
6. Low-cost Road Construction
7. Extended Applications

August 1st to 6th, 2010

## Heartland of Japan

Nagoya is a safe, beautiful, and historical city. Nagoya's history began with Nagoya Castle, built by the famous Shogun Tokugawa Ieyasu in 1612. Since then, his successors encouraged the growth of cultural arts such as Noh & Kabuki theater (Japanese dance), tea ceremonies, and flower arrangement. All traditional Japanese arts are enjoyed in Nagoya today.

Noh (Japanese dance)

Village of Shirakawa

## World Heritage

The village was registered on World Heritage list in 1995. The remaining thatched houses of the village of Shirakawa, which is located 160 Km away from Nagoya, are unique in Japan because of their impressive height and scale.
