EDUCATION

Ph.D. in Civil, Structural and Environmental Engineering, 2005
University at Buffalo, Buffalo, NY
-Dissertation: "*Reactive contaminant transport modeling using analytic element flow solutions"*
-Advanced graduate certificate in Geographic Information Science

B.S. in Civil Engineering, 1999
Bucknell University, Lewisburg, PA

RESEARCH INTERESTS

Numerical and analytical method development for modelling of environmental systems, with a focus on groundwater flow, surface water hydrology, and subsurface heat and solute transport

- Numerical methods, upscaling approaches, and parameterization issues in surface water hydrologic modeling
- Modelling regional- and local-scale groundwater flow with the analytic element method, series solution, and extended finite element approaches
- Design, modelling, and performance assessment of geoexchange ground loops

Other interests include uncertainty assessment; model comparison and evaluation; and decision-making support with environmental models.

AWARDS / FELLOWSHIPS

Canada Research Chair (Tier II) in Hydrologic Modelling and Analysis (2016)
Awarded to emerging high-quality Canadian scholars by NSERC

University of Waterloo Outstanding Performance Award (2016)
For outstanding contributions in teaching and scholarship

Sandford Fleming Foundation Teaching Excellence Award (2014)
For UW Engineering faculty members with a continued record of excellence in undergraduate teaching

UW Faculty of Engineering Distinguished Performance Award (2012)
Awarded for outstanding contribution in teaching, scholarship and service.

Early Researcher Award (2011)
Awarded by the Ontario Ministry of Research and Innovation to promising researchers in the first five years of their academic career.

IGERT Fellowship in Geographic Information Science (1999-2004)
Interdisciplinary NSF-sponsored Integrative Graduate Education and Research Training fellowship in the field of geographic information science under the supervision of University at Buffalo's National Center for Geographic Information and Analysis

CSEE Departmental Chair's Recognition Award (2004)
For high scholastic achievement and dedication to the Civil, Structural, and Environmental Engineering department of the University at Buffalo

Don Rennie Memorial Award (2002)
For outstanding environmental modeling presentation at the 12th annual Great Lakes Research Consortium Student/Faculty Conference

D83. **Craig, J.R.**, I. Janković, and A.J. Rabideau, *Modeling groundwater/surface water interaction with the analytic element method.* 12th annual Great Lakes Research Consortium Student/Faculty Conference, Syracuse, NY, March 15-16, 2002

D84. **Craig, J.R.**, I. Janković, and R. Barnes, *Accommodating multi-scale analytic element models with the nested superblock approach*. AGU Fall Meeting 2001, San Francisco, CA, December 10-14, 2001

RESEARCH AND EQUIPMENT GRANTS

NSERC Canada Research Chairs Program (PI), $500,000 (100%)
Canada Tier II Research Chair in Hydrologic Modelling and Analysis, 2016-2021

NSERC Engage Grant (PI, with industrial partner Ontario Power Generation), $25,000 (100%)
Improved modelling of managed watersheds in the Canadian Shield in support of hydropower reservoir management, 2016

UW Water Institute Seed Grant (Co-applicant with P. Van Cappellen and 9 others), $23,000 (<5%)
Do watershed biogeochemical models really inform coastal ecology and environmental policy?(workshop), 2016

NSERC Collaborative Research & Development Grant (Co-PI With W. Quinton/J. Baltzer (WLU), M. Hayashi (U Calgary), O. Sonnentag (U Montreal), A. Berg (U Guelph)), $294 000 (10%)
Consortium for Permafrost Ecosystems in Transition (CPET), 2015-2017

Nuclear Waste Management Organization (NWMO) Sponsored Research Agreement (Co-PI with J. Sykes (PI) and R. Gracie), $700 000 (33%)
Evolution of deep groundwater systems – Phase II, 2014-2016

NSERC Discovery Grant, Individual (PI), $120 000 (100%)
Hybrid numerical-analytical methods for subsurface flow simulation, 2012-2017

Early Researcher Award (ERA), Ontario Ministry of Research and Innovation (PI), $150 000 (100%)
Assessing the vulnerability and environmental impact of pumping wells near wetlands and streams, 2011-2016

Carbon Management Canada, (Co-PI with D. Krewski/M. Fall (U Ottawa), J. Nathwani/R. Gracie/L.S. Matott/M Dusseault (U Waterloo) and J. Arvai (U Calgary)), $930 000 (5%)
Risk assessment and management of carbon capture and storage in a Canadian context, 2011-2014

Environment Canada, Contribution Program, (Co-PI with B.A. Tolson), $170 000 (40%)
Dealing with heterogeneity in distributed hydrological models and atmospheric land surface schemes, 2010-2014

Ontario Centres of Excellence (OCE) Technical Problem Solving (TPS) Grant (PI), $23 345 (100%)
Improving accessibility of geothermal energy for urban and residential users, 2010-2012
Partner: NextEnergy, Inc.

NSERC Discovery Grant, Individual (PI), $114 000 (100%)
Mixed local and regional-scale groundwater flow modeling, 2006-2012

INDUSTRY-MATCHED SCHOLARSHIP FUNDING SECURED

NSERC IPS-1 MASc Scholarship for Nicholas Sgro (BC Hydro), $46 000

NSERC IPS-1 MASc. Scholarship for Simon Haslam (NextEnergy, Inc.), $42 000

NSERC IPS-1 MASc. Scholarship for Richard Simms (NextEnergy, Inc.), $42 000

NSERC IPS-2 Ph.D. Scholarship for Andy Snowdon (AquaResource, Inc.), $76 000

TEACHING EXPERIENCE

University of Waterloo

Advanced Mathematics (ENVE 321)
Advanced Mathematics for Environmental Engineering (CIVE 673)
Contaminant Transport (EnvE 573)
Differential Equations (EnvE 223)
Digital Computation (CivE 121)
GIS applications in Civil Engineering (CIVE 497/770)
Hydrology (CivE 486)

University at Buffalo

Civil Engineering Applications of GIS (CIE 507)
Modern Methods of Engineering Computation (EAS 451)
Introduction to Environmental Engineering (CIE 440) [Co-Instructor]

GRADUATE STUDENT SUPERVISION (CURRENT STUDENTS)

1. Devoie , É., Civil and Environmental Engineering (Collaborative Water Program) (MASc.)
   Topic: Regional scale modelling of northern boreal hydrology
2. Abedian, E., Civil and Environmental Engineering (PhD.)
   Topic: Permafrost modelling using XFEM
3. Chlumsky, R., Civil Engineering (Collaborative Water Program) (MASc.)
   Topic: Hydrological model assessment and validation in support of decision making
4. Ladubec, C., Civil Engineering (Ph.D.) (co-advisor Dr. R. Gracie)
   "Efficient numerical models for CO_2 sequestration"
5. Sgro, N., Civil Engineering (MASc.)
   Topic: Improved watershed models for reservoir management
6. Chowdhury, M., Civil Engineering (Collaborative Water Program) (MASc.)
   Topic: Assessing interactions between groundwater and surface water in data-poor systems

GRADUATE STUDENT SUPERVISION (FORMER STUDENTS)

1. Snowdon, A.P., Civil Engineering (PhD., 2016)
   "Upscaling of coupled models with topography-driven surface-water/groundwater interactions"
2. Princz, D., Civil Engineering (MASc., 2016)
   "The CRANE framework for building integrated modelling systems"
   (co-advisor Dr. E.D. Soulis)
3. Ramadhan, M., Civil Engineering (MASc., 2015)
   "A semi-analytical particle tracking algorithm for arbitrary unstructured grids"
4. Ameli, A.A., Civil Engineering (Ph.D., 2014)
   "Semi-analytical methods for simulating the groundwater-surface water interface"
5. Sheffield, P., Civil Engineering (MASc., 2014)
   "The utility of using multiple conceptual models for the design of groundwater remediation systems"
6. Simms, R., Civil Engineering (MASc. 2013)
   "The effects of soil heterogeneity on the performance of horizontal ground loop heat exchangers"
7. Haslam, S., Civil Engineering (MASc. 2013)
   "Informing the practice of ground heat exchanger design through numerical simulations"
8. Wong, S., Civil Engineering (Ph.D., withdrawn)
   "Series solution methods for regional groundwater systems with natural stratigraphy"
   (co-advisor: Dr. J. Sykes*)
9. Nettasana, T., Civil Engineering (Ph.D. 2012)
   "Conceptual model uncertainty in the management of the Chi River Basin, Thailand"
   (co-advisors: Dr. B. Tolson, Dr. J. Sykes*)
10. Jones, E.L., Biology/Civil Engineering (MASc. 2011)
    "Ecological modelling of Lake Erie : Sensitivity analysis and simulation of nutrient, phytoplankton, and zooplankton dynamics" (co-advisor: Dr. R. Smith)
11. Huo, C., Civil Engineering (MASc., 2010)
    "Mathematical simulation of a dipole delivery system for in situ remediation",
    (co-advisor: Dr. N.R. Thomson)
12. Liu, G., Civil Engineering (Ph.D., 2010)
    "Improved interflow and infiltration algorithms for distributed hydrological models",
    (co-advisor: Dr. E.D. Soulis)
13. Snowdon, A.P., Civil Engineering (MASc., 2010)
    "Improved numerical methods for distributed hydrological models"
14. Dunning, C., Civil Engineering (MASc., 2009)
    "Hydrologic modeling of the Upper South Saskatchewan River Basin: Multi-basin calibration and gauge de-clustering analysis", (co-advisor: Dr. E.D. Soulis)

AWARDS TO GRADUATE STUDENTS

1. 2008 AGU Fall Meeting Outstanding Student Paper Award (Hydrology Section) [A.P. Snowdon]

OTHER HQP SUPERVISION

1. Franklin, R., Z. Schenk, N. Wennyk, and F. Zaman, Env. Eng. 4th year design advisees (2015-2016)
   Plastic pollution cleanup of the Great Lakes
2. Devoie, E., Co-op Research Assistant (co-supervised with W. Quinton, WLU) (Summer 2015)
   Field and modelling investigations of cascading bog systems in the NWT
3. Shamalisham, N., Co-op Research Assistant (co-supervised with N.Basu/M. Shafiei) (Winter 2015)
   Hydrological modelling of the Grand River watershed
4. Cooper, J., Undergraduate Research Assistant (Fall 2014)
   Hydrological model development of the Grand River; Downscaling daily precipitation data
5. Chandrakumaran, T., Undergraduate Research Assistant (Fall 2014)
   Hydrological model development of the Grand River; Downscaling daily precipitation data
6. Luczko, E., Research Assistant (Summer 2014)

Three-dimensional visualization for groundwater models

7. Dhother, R., J. Dickhout, S. Ferguson, and N. Mallick, Env. Eng. 4th year design advisees (2013-2014)
   End pit lake remediation
8. Brown, G., T. Granger, R. Reid, L. van Waterschoot, Env. Eng. 4th year design advisees (2013-2014)
   Project Title: "Fen Design for Reclamation of Oil Sands Developed Land"
9. Werstuck, C., Co-op Research Assistant (co-supervised with B.A. Tolson) (Spring 2013)
   Hydrologic Modelling Tool Development
10. Zhang, M., R. Wan, V. Wei, Env. Eng. 4th year design project advisees (2012-2013)
    Pump and treat optimization near surface water features
11. Chen, E., J. Khasakia, A. Kranyak, and H-S. Yoon, Civ. Eng. 4th year design advisees (2012-2013)
    Project Title: "Implementing geothermal heating and cooling at the Columbia Icefield"
12. Ranjram, M., Undergraduate Research Assistant (Fall 2012)
    3D Models of stratigraphy for semi-analytical series solution methods
13. Huang, S., Undergraduate Research Assistant (Fall 2012)
    Benchmarking of routing algorithms, hydrological code development
14. Zhang, C., Undergraduate Research Assistant (Spring 2012)
    Interfacing atmospheric and surface water models using ArcGIS
15. Huang, S., Co-op Research Assistant (Spring 2012)
    Hydrological modelling of the Speed and Eramosa rivers; Geodatabase development
16. Ranjram, M., Co-op Research Assistant (Spring 2012)
    3D Models of stratigraphy for semi-analytical series solution methods
17. Paya, Karol, Co-op Research Assistant (Winter 2012) [co-supervisor: B.A. Tolson]
    GIS analysis for hydrological modelling support; assembly of a Great lakes watershed database
18. Hillier, C., Geo. Eng. 4th year design project advisee (2011-2012)
    Project title: "A water supply system for Finse, Norway"
19. Stonebridge, G., Undergraduate Research Assistant (Fall 2011)
    Benchmarking, testing, and application of hydrological simulation models
20. Spraakman, S., Research Assistant (Spring 2011)
    Preparation of technical documentation for hydrological simulation model
21. Pearson, S., Undergraduate Research Assistant (Spring 2011)
    Hydrological model preprocessor development
22. Ranjram, M., Undergraduate Research Assistant (Spring 2011, Winter 2012)
    Representational software for layered stratigraphic systems
23. Khedr, A., Undergraduate Research Assistant (Winter 2011)
    Development of statistical output modules for surface water modelling software
24. Arlos, M., J. Chan, K. Chan, and H. Lo, Env. Eng. 4th year design project advisees (2010-2011)
    Project title: "TCE and PHC groundwater remediation alternatives for Simmons Lake Gas Station"
25. Zhang, Bo, Visiting Scholar (2010)
    Research into topography-based hydrologic modeling
26. Snowdon, A.P., Research Assistant (Winter 2010)
    Hydrologic algorithm development and design
27. Chen, W., Undergraduate Research Assistant (Winter 2010) [co-supervisor: L.S. Matott]
    Optimization software development to handle netCDF and MS Access formats
28. Haslam, S., Geological engineering 4th year design project advisee (2009-2010)
    Project title: "Design of a culvert system for Too Much Gold creek in Whitehorse, Yukon"
29. Haslam, S., Undergraduate Research Assistant (Winter 2009)
    Analysis of flow bypassing in single well reactive dipole flow tests
30. Chung, S., A. Mohino-Barrie, and N. Nalliah, Environmental/Civil engineering 4th year design project advisees (2008-2009)
    Project title: "Prioritization of borehole capping in the Great Artesian Basin, Australia"
31. Simms, R., Undergraduate Research Assistant (Winter 2008)
    Software and algorithm development for groundwater flow, contaminant transport, and distributed surface water modeling

32. Chevalier, L., R. Reaume, and A. Tymec, Env. Eng. 4th year design project advisees (2007-2008)
Project title: "Optimization of sorption liners in landfill design"
33. De Laplante, N., Geological engineering 4th year design project advisee (2007-2008)
Project title: "Optimization of remediation response functions for an MTBE contaminated aquifer"
34. Zheng, Y., Geological engineering 4th year design project advisee (2007-2008)
Project title: "Design of a data calibration and reduction system for dynamically-tuned gyroscopes"
35. Labalestra, J., Geological engineering 4th year design project advisee (2007-2008)
Project title: "Non-destructive hydroelectric power generation"
36. Heidlauf, T., Visiting Scholar/Intern (Summer 2007)
Software and method development for groundwater flow and contaminant transport in conjunction with Waterloo Hydrogeologic, Inc., a Schlumberger Company
37. Zhu, P., Co-op Research Assistant (Winter 2006)
Developed a library of analytical contaminant transport solutions in C++
38. Dunning, C., and S. Mathew, Environmental engineering 4th year design project advisee (2005-2006)
Project title: "A pipe network modelling code"

RELATED PROFESSIONAL EXPERIENCE

2012-16 **Technical Consultant,** for the Canadian National Research Council- Oceans, Coastal, and River Engineering Division (NRC-OCRE)
Software development, documentation, and technical advice in support of reservoir inflow forecasting for BC Hydro, TransAlta, and New Brunswick Hydro. Implemented a state-of-the art version of the UBC Watershed model as part of the Canadian Hydrological Model Stewardship project.

2005 **Senior Research Associate,** CSEE Dept., University at Buffalo, Buffalo, NY
Developed and implement approaches for linking reactive contaminant transport models to analytic element flow solutions, developed batch reaction modules for simulation of reactive transport.

2004 **Research Assistant,** CSEE Dept., University at Buffalo, Buffalo, NY
Gathered data and developed a regional groundwater model of the entire Susquehanna Basin and participated in distributing Grid-based calibration models across universities in the northeast US.

Curriculum Consultant, National Center for Geographic Information and Analysis, Buffalo, NY
Developed a comprehensive educational program to fulfill mathematics proficiency requirements for in the NSF-funded IGERT program in geographic information science.

Research Assistant, Environment and Society Institute, Buffalo, NY
Developed databases and managed web sites for an interdepartmental university research institute.

2000 **Research Assistant,** University at Buffalo, Buffalo, NY
Investigated application of parallel computing and object-orientation to regional scale groundwater software. Implemented genetic algorithms for optimization of pump and treat remediation strategies.

1997-8 **Draftsman/Architectural Assistant,** Catapano Engineering, P.C. Permit Research, Melville, NY
Designed, revised, and edited architectural, structural, and mechanical plans using AutoCAD. (summers)

PROFESSIONAL SHORT COURSES AND WORKSHOPS

Craig, J.R., *Raven-UBCWM hydrological modelling workshop*, Co-sponsored by BC Hydro and the British Columbia branch of the Canadian Water Resources Assoc., Burnaby, B.C., Feb 18, 2016

Craig, J.R., *Raven hydrological modelling workshop*, Yellowknife, NT, June 15-16, 2015

Craig, J.R., *Conceptual groundwater model development with the Analytic Element Method*, Short course for groundwater practitioners, Matrix Solutions, Inc., Breslau, ON, December 15, 2013

Craig, J.R., *Conceptual groundwater model development with the Analytic Element Method*, Short course for groundwater practitioners, S.S. Papadopulos & Associates, Bethesda, MD, August 6-7, 2009

Craig, J.R., (primary instructor), A.J. Rabideau, I. Janković, and L.S. Matott, *Modeling regional groundwater flow with the Analytic Element Method: Source water assessment and GIS*, Short course for groundwater practitioners (1.6 CEUs), University at Buffalo, June 28-29, 2004

INVITED SEMINARS

Craig, J.R., *Towards more trustworthy hydrologic models: Evaluating model choices and learning from data*, Warren Lecture (Invited), University of Minnesota, March 4, 2016

Craig, J.R., *Developing trustworthy hydrological models,* University of Waterloo Ecohydrology research group seminar series, Invited, October 28, 2014

Craig, J.R., *Developing trustworthy hydrological models,* NRC- Canadian Hydraulics Centre brown bag seminar series, Invited, May 12, 2011

Craig, J.R., *Analytical models of porous media flow in heterogeneous media (an engineer's hobby problem),* University of Waterloo Applied Mathematics Seminar Series, November 18, 2010

Craig, J.R., *Pseudoanalytic function theory and its potential application to groundwater flow problems*, Invited seminar, James Cook University, August 22, 2008

Craig, J.R., *Regional groundwater modeling: Meeting the computational challenge*, Invited seminar, University of Waterloo, July 8, 2004

Craig, J.R., *Advances in regional groundwater modeling*, Invited seminar, Drexel University, March 16, 2004

INTERNAL SERVICE

Member, Department Advisory Committee for Appointments (DACA), Geotech Hire, 2015-
–

Chair, Outcomes Planning Committee, Dept. of Civil and Environmental Engineering, 2014-2016

Member, Strategic Management Committee, UW Water Institute, 2012-2016

Member, Strategic Planning Committee, UW Water Institute, 2009-2016

Member, Department Tenure and Promotion Committee, Dept. of Civil and Environmental Engineering, 2013-2015

Member, Outcomes Planning Committee (formerly SpFOPs), Faculty of Engineering, 2012-2015

EnvE/GeoE Class of 2015 Class Professor, Dept. of Civil and Environmental Engineering, 2012-15

Member, Department Advisory Committee for Appointments (DACA), Grad Attributes Lecturer, 2014-2015

Member, Department Advisory Committee for Appointments (DACA), Environmental Hire, 2013-2015

Member, World Water Day Graduate Research Fair Organizing Committee, UW Water Institute, 2013-2014

Chair, Communications Committee, UW Water Institute, 2010-2014

Member, Curriculum Renewal Committee, Dept. of Civil and Environmental Engineering, 2011-2014

Associate Chair of Computing, Dept. of Civil and Environmental Engineering, 2008-2013

Member, Vision 2015 Planning Committee, Dept. of Civil and Environ. Engineering, 2010-2011

Organizer, World Water Day Graduate Research Fair 2011/2012, UW Water Institute, 2011-2012

Enviro/Geo 4A Class Professor, Dept. of Civil and Environmental Engineering, Fall 2010

Coordinator, Environmental Lab Space Assessment, Dept. of Civil and Environmental Engineering, 2009

Environ. Seminar Series Coordinator, Dept. of Civil and Environmental Engineering, 2007-2009

Explorations / March Break Open House Departmental Representative, Faculty of Engineering, 2008-2009

Graduate Open House Coordinator, Dept. of Civil and Environmental Engineering, 2007-2008

Sandford Fleming Foundation Technical Speaking Competition Coordinator, Faculty of Engineering, 2006-2008

Member of Engineering Faculty Council, Faculty of Engineering, 2007-2008

Civil 2B Class Professor, Dept. of Civil and Environmental Engineering, Spring 2007

Representative to the Mathematics Faculty Council, Faculty of Engineering, 2006-2007

ExpecTAtions Faculty Mentor, Dept. of Civil and Environmental Engineering, 2006

EXTERNAL SERVICE

Participant (Invited), *1st Workshop on improving the theoretical underpinnings of hydrologic models,* Bertinoro, Italy, April 24-27, 2016

Conference Technical Committee Member, 7th Intl. Conference on the Analytic Element Method (ICAEM), Golden, CO, May 30-31, 2015

Associate Editor, *Groundwater,* 2014-

Executive Committee Member, Canadian Society for Hydrological Sciences (CSHS), 2012-

High School Outreach, Presentation on Environmental Models, Waterloo-Oxford District Secondary School, April 2014

Conference Session Co-Chair, *Hydrological modelling*, CWRA 2014 Canada Water Resources Congress, Hamilton, ON, Jun. 2-4 2014

Conference Organizing Committee Member, 6th Intl. Conference on the Analytic Element Method (ICAEM), Golden, CO, May 2013

Conference Session Co-Chair, *Hydrological modelling innovation in Canada*, CWRA/CGU Joint Meeting 2012, Banff, AB, Jun. 5-8 2012

Conference Session Co-Chair, *Translating watersheds into trustworthy hydrological models*, AGU Fall Meeting 2011, San Francisco, CA, Dec. 5-9 2011

Conference Session Co-Chair, *Analytical and semi-analytical models of subsurface flow and transport***,** AGU Fall Meeting 2007, San Francisco, CA, Dec. 10-14 2007

Conference Technical Committee Member, 5th Intl. Conference on the Analytic Element Method (ICAEM), Manhattan, KS, May 14-18, 2006

Peer Reviewer (Manuscripts): Water Resources Research, Advances in Water Resources, Journal of Hydrology, Ground Water, Journal of Contaminant Hydrology, Hydrological Sciences Journal, Journal of Hydraulic Engineering, Journal of Environmental Engineering, Journal of Hydrologic Engineering, Hydrogeology Journal, Computers and Geotechnics (*Recognized Reviewer*), Computers and Geosciences, Journal of Environmental Engineering and Science, Journal of Hazardous Materials, Open Hydrology Journal; Applied Mathematical Modelling (*Recognized Reviewer*), Quarterly Journal of Mechanics and Applied Mathematics; Mathematical Problems in Engineering

Peer Reviewer (Grant Proposals): Canada Foundation for Innovation (CFI), Qatar National Research Fund (QNRF), NSERC Discovery Grant Program, NSERC Strategic Project Grant Program, Mitacs Accelerate Program, OMAFRA New Directions Research Program.

SOFTWARE

Craig, J.R., and L.S. Matott, **VISUAL AEM 1.0**: A Windows-based graphical user interface for analytic element modeling of groundwater flow and transport, post processing, and analysis.

Craig, J.R., and the Raven Development Team, **RAVEN 2.6**: An open-source, object-oriented, numerically rigorous hydrological modelling framework for simulating the water cycle at catchment and sub-catchment scales.

Craig, J.R., **BLUEBIRD 3.31**: Object-oriented library for analytic-based modeling of multi-layer groundwater flow in heterogeneous aquifers with particle tracking and surface water interaction module.

Craig, J.R., **CARDINAL 2.0**: Object-oriented library for analytical and numerical 2D multi-species aqueous solute transport modeling using analytic element flow solutions from the Bluebird library.

Craig, J.R., **RXNLIB 0.8**: Object-oriented library for simulation of multi-species aqueous batch reactions, equilibrium and non-equilibrium sorption. Currently includes modules for generic Cation Exchange and parent-daughter decay, and a variety of sorption and partitioning models.

L.S. Matott, **Craig, J.R.**, Tolson, B.: **OSTRICH DDS MODULE**: Dynamically-dimensioned search optimization algorithm module for multi-engine optimization software OSTRICH.

Craig, J.R., **DIPOLE3D 1.0**: Numerical implementation of a three-dimensional analytical solution for a single-well dipole flow field with particle tracking.

PROFESSIONAL AFFILIATIONS

Member, Professional Engineers Ontario (PEO)
Member, American Geophysical Union (AGU)
Member, Canadian Geophysical Union (CGU)
Member, Canadian Water Resources Association (CWRA)
Member, Canadian Society for Hydrological Sciences (CSHS)
Member, National Ground Water Association (NGWA)
Member, Chi Epsilon Honor Fraternity
Member, Taiga Plains Research Network (TRPN)
Member, the Water Institute at UW
Collaborator, NSERC Canadian FloodNet
Member, Waterloo Institute for Sustainable Energy (WISE)
Member, Canadian Geothermal Research Council (CanGRC)

HOBBIES

In addition to my love for teaching and research, I am a husband and father of two, a musician (I play electric bass and acoustic guitar), an illustrator (primarily with pen and ink), an avid reader of historical fiction, and a lover of the New York Times Sunday crossword puzzle.
