PR 6 - Posted by Dr. Tarek Hegazy, University of Waterloo, tarek@uwaterloo.ca

Description: A foundations subcontractor has been asked to place foundation on a flat site (shown) for a building according to the provided cross-section. The tasks are: excavating trench, placing forms on the trench sides, and then concreting the foundation. The foundation wall is not included in the scope of work.

The subcontractor intends to do the work as follows:

- The Excavation crew works 8 hours per day and uses a 0.29m3 tractor/backhoe;
- The Formwork crew works 8 hours per day, while the Concreting crew works 9 hours per day;
- The Formwork material can be used for two uses;
- The Formwork starts 2 days after start of excavation;
- Concreting will not start before day 14;
- Concrete production is 4.5 m 3 per hour;
- The Concrete supplier's quote is $\$ 20,000$ (includes material);
- Deadline is 18 days; indirect cost $=\$ 300 /$ day; a reporting period is 3
 days and interest rate is $1 \%$ per period; markup is 10\%; and owner retention is 5\% of each invoice; and

- The activities' data can be found in the following table:
